☞ Template to start

- load the template in high impact news event, e.g. tothemoonai

☞ Currency

- load the chart to trade, e.g. XAUUSD

☞ Timeframe

- specify the timeframe, e.g. M1

☞ Seconds before event to start chart

- Seconds before the news to load the template
- Negative means seconds after the news to load the template

☞ Minutes after event to close chart if no position (time1)

- Minutes after the news to start monitoring the chart and close chart once there is no position in market

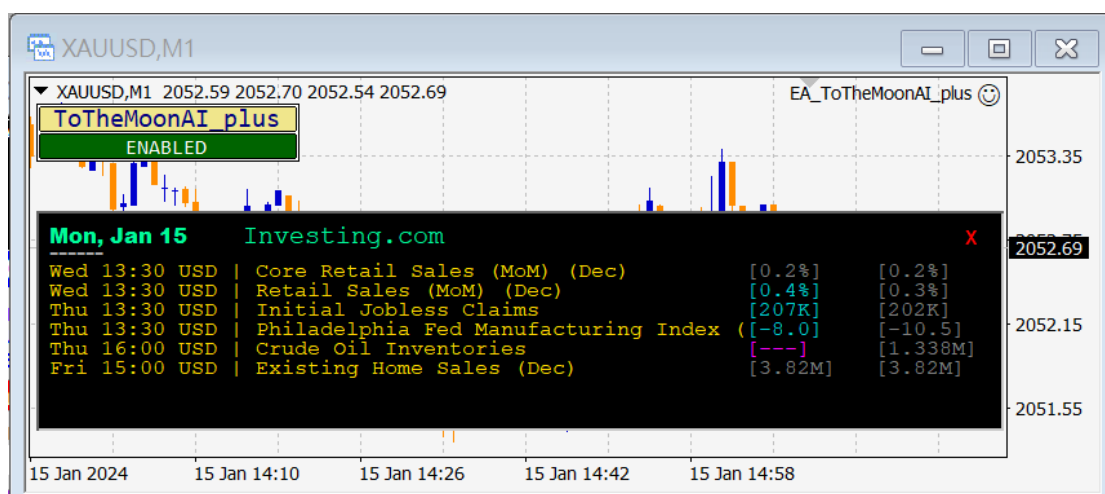

☞ Minutes after event to close chart and all orders (time2)

- Minutes after the news to close the chart and close all opened orders
- To set a deadline to close orders
- Zero, if you don't need a deadline by minutes

☞ Close chart & all orders 30min before day end in market time

- True, close the chart & all orders 30minutes before the market day end
- False, if you don't need a deadline by day end
- You can use this option or time2 to set a deadline

- ☞ 5x24 process time
  - True, use for 5 days trading, e.g. XAUUSD or 28 currencies
  - False, use for 7 days trading, e.g. crypto-currencies
  - Use it if the monitoring time is beyond Friday, e.g. news event 20:30 Friday, and time1 is 240, then time1 will be extended to 00:30 Monday
- ☞ Source Magic Number
  - Close the order with this magic number, blank for any
  - You can apply more than one magic number by separating with comma, e.g. 77,88,99
- ☞ Source Comment
  - Close the order with this comment, blank for any
  - You can apply more than one comment by separating with comma, e.g. comment1,comment2,comment3
- ☞ Slippage
  - Slippage to close orders
- ☞ Country setting
  - Select the country of news event, e.g. USD ~US, EUR ~Europe
  - You can select multiple countries, e.g. USD & EUR, then template is loaded in news event of these countries.
- ☞ When you setup correctly, you can see the following screen.
  - When the news event is come, a new chart is opened with your template loaded.
  - When the time1 is reached, EA will monitor the orders and close the chart once there is no order in market.
  - When the time2 is reached, close the chart and close all orders if any.
  - Close the chart and close all orders if any in market day end
